

Fiber optic terminal box in the rack

Overview

The Rack Mounted Optical Cable Terminal Box is a metal enclosure used for fiber cable management in rack systems. It enables fiber splicing, termination, and patching in a single compact unit. A typical PON topology (GPON, XGS-PON, or 25G PON) flows OLT → fiber distribution hub → passive splitters → distribution/drop fibers → premises. Fiber rack-mount enclosures use the HDX cassette platform to provide an ultra-high-density solution for. This product is a high quality, miniature optical sheet and Electrostatic painting of plastics. Suitable for both ribbon and round cable Available for LC/SC/FC/ST adapters Available for 6/12/24/48 port capacity Fiber Network FTTH Applications Max. Capacity of. We offer various ranges of an optical joint closure from a small count to a super high count for under ground and aerial installation, and also offer an optical cabinet with compact size suitable for limited space for indoor / outdoor usage.
