

Four-circuit distribution box model

Article Overview

Common models of 4-circuit distribution boxes include the HT-4 by Solaris and the 56CB4N by SUNTREE, designed for safe and organized power distribution.

A 4-circuit distribution box is an electrical enclosure that safely distributes power to four separate circuits, protecting the system from overloads, short circuits, and other electrical faults . These boxes are widely used in residential, commercial, and industrial applications and can accommodate miniature circuit breakers (MCBs), RCDs, or solar DC breakers depending on the model .

Notable Models

1. HT-4 Distribution Box (Solaris)

- Designed to house up to 4 circuit breakers.
- Constructed with high-quality materials for durability and safety.
- Suitable for residential, commercial, and industrial installations.

2. 56CB4N 4-Way Distribution Box (SUNTREE)

- Part of the 56 Series, engineered for surface-mounted installations in harsh environments.
- Weatherproof and dustproof with an IP66 rating, protecting against dust and high-pressure water jets.
- Features a DIN rail for up to four single-pole modules or a 4-pole breaker/RCD.
- UV-stabilized polycarbonate construction ensures long-term durability outdoors.
