

Gulf Region ODF Patch Panel 6 Cores

Overview

Choice of 6 or 12 fiber fibre patch panel for multimode and single mode fibre cable. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. It is used for direct connection and branch connection of indoor optical fiber, and plays the role of storage of tail fiber disk and protection of joint. You can order this 6 port LC fiber patch panel ODFJ6LC with LC duplex single mode or multimode adapters and 6 SC fiber optic. Answer first: ODF and fiber patch panel are product and architecture roles, not universally separate device classes: select an enclosure by splice, patch, cross-connect, protection, slack, routing, density, access, growth, environment, and maintenance requirements. 3-E scope. An optical Distribution Frame (ODF) or patch panel is the starting point for optical cables, most commonly found in rack cabinets in Head End (HE)/Central Office (CO)/Point of Presence (POP)/Data Centre (DC) or smaller cabinets or enclosures. Ideal for FTTH, with SC, LC, ST, and FC connectors. Certifications: CE, ROHS, ISO9001, ANATEL.
