

H3C Core Switch Reboot

Article Overview

You can reboot an H3C switch using the command line interface or the web management interface.

Rebooting via Command Line Interface (CLI)

- Access the Switch: Connect to your H3C switch using a console cable or SSH.
- Enter System View: Type the command `system-view` to enter the system configuration mode.
- Reboot Command: Use the command `reboot` to restart the switch. You may be prompted to confirm the action. Type `y` to proceed with the reboot .

Scheduling a Reboot

- If you want to schedule a reboot, you can use the command:

`schedule reboot at hh:mm [yyyy/mm/dd]` Replace `hh:mm` with the desired time and `yyyy/mm/dd` with the date if needed. This command allows you to set a specific time for the switch to reboot .

Rebooting via Web Management Interface

- Log in to the Web Interface: Open a web browser and enter the IP address of the switch to access the web management interface.
- Navigate to Maintenance: From the left navigation pane, select `Device > Maintenance > Reboot`.
- Confirm Reboot: Click on `Reboot Device`, then confirm the action in the dialog box that appears .
