

Has the price of optical fiber decreased

What are the recent price trends

Overview

From late 2025 into 2026, global fibre optic prices have increased sharply and across the board — standard single-mode, bend-insensitive grades, and in turn pre-terminated assemblies, patch leads, and bulk cable. October 11 news, during the recently held 2024 World Fiber Optic Cable Conference, CRU chief analyst and cable group director Wang Chenfei, CRU senior analyst Vishnu Patidar introduced the current global fiber optic cable market pattern, and analyzed the trend of data center fiber optic cable. CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets. The global fiber optic component market is experiencing significant growth, driven by increasing demand from AI data centers, 5G networks, and FTTH (Fiber to the Home) rollouts. The market size was valued at USD 38. The total consumption indicated a noticeable increase from 2012 to 2025: its value increased at an average annual rate of X% over the last twelve-year period. Many buyers are still negotiating price.
