

# High-density dual-port information panel fixed stock available

## Article Overview

High-density dual-port fixed fiber panels are available in 1U, 2U, and 4U configurations, supporting up to 144 fiber connections per unit with pre-installed MPO or LC cassettes for fast deployment.

### Product Overview

High-density dual-port fiber panels are designed for space-efficient, high-performance fiber management in data centers, central offices, and FTTH head-ends. Fixed panels provide a stable, non-sliding configuration ideal for backbone fiber distribution, while modular options allow for future expansion . Panels typically support duplex LC ports or MPO/MTP connections, with capacities ranging from 24 to 144 fibers per 1U rack unit .

### Key Features

- Rack Unit Sizes: 1U, 2U, 4U options for flexible deployment .
- Port Density: Up to 48 duplex LC ports per 1U (CommScope HD panels) or up to 144 fibers with MPO pre-installed cassettes (Huihongfiber panels), .
- Pre-Terminated Options: Panels can come with factory-installed MPO to LC cassettes, adapters, and cables, enabling plug-and-play installation and reducing deployment time .
- Compatibility: Supports single-mode and multimode fibers, UPC and APC polished connectors, and various adapter types (LC, SC, ST, FC), .
