

High-density integrated power cabinet upgraded version in stock

Overview

Free-standing front and rear aligned integrated equipment that reduces footprint and lowers on-site installation costs. The newest addition to the family of Integrated Equipment products, the Integrated Power Center 2 (IPC2™) provides maximum flexibility to meet customers'. The demand for high power density cabinets is surging, driven by the relentless growth of data, AI, and edge computing. The eMIMO architecture supports multiple input (grid, PV, genset) and output (12/24/48/57 V DC, 24/36/220 V AC) modes, integrating multiple. Our lithium iron phosphate (LFP) battery cells combine advanced core technology and strict production standards, featuring high energy density, extreme safety, and ultra-long service life—your reliable choice for multi-scenario power supply. 5Ah-684Ah capacities, they fit needs from. Designed for high-density applications such as AI workloads, this power conditioning and distribution cabinet delivers the performance and reliability of a custom-engineered system with the efficiency and cost-effectiveness of a pre-packaged, factory-tested solution. Supports up to 1MW+ cooling per rack, with 100kW air-based cooling and an adjacent CDU bringing liquid to the chip. Sample equipment supported. OptiMOS™ dual- and quad-phase power modules integrate OptiMOS™ power stages with proprietary inductors, capacitors and optimized packaging on a single substrate.
