

Home Broadband Fiber Optic Router Wired

Article Overview

For high-speed fiber internet, a wired router with gigabit Ethernet ports ensures maximum performance, low latency, and reliable connectivity.

Why Choose a Wired Fiber Router

Wired routers are ideal for fiber-optic connections because they provide stable, high-speed connections without the interference or signal loss that can affect Wi-Fi. They are particularly suitable for gaming, 4K/8K streaming, video conferencing, and smart home setups. Wired routers often include advanced features like deep packet inspection, Quality of Service (QoS), VPN support, and multiple WAN/LAN ports, allowing full utilization of gigabit or multi-gigabit fiber plans .

Recommended Routers for Fiber Internet

- NETGEAR Nighthawk Tri-Band WiFi 7 Router (RS700S)
- Supports multi-gigabit fiber speeds with 10G LAN/WAN ports and four 1G LAN ports.
- Features LAN aggregation for combining ports to achieve up to 2 Gbps.
- Powerful internal antennas cover up to 3,500 sq. ft., ideal for wired and wireless setups .
- Ubiquiti Unifi Security Gateway (USG)
- Wired router with 1 WAN and 2 LAN/Gigabit ports, capable of full 1 Gbps throughput.
