

Hot-selling DC power distribution unit for oil and petrochemical equipment cabinets

Article Overview

High-reliability DC PDUs with remote monitoring, surge protection, and modular outputs are ideal for oil and petrochemical equipment cabinets.

Key Features to Look For

- **Multi-Output Distribution:** DC PDUs can distribute power from batteries or DC/DC converters to multiple control units and electrical loads, replacing traditional fuses with electronic switches for safety and efficiency .
- **Remote Monitoring and Control:** Many units, such as smart DC distribution panels, allow remote ON/OFF control, real-time monitoring of voltage, current, and temperature, and automated fault alerts .
- **Rugged Design:** For oil and petrochemical environments, PDUs are engineered to withstand extreme temperatures (-40°C to $+50^{\circ}\text{C}$), shock, vibration, and moisture, ensuring uninterrupted operation .
- **Safety and Protection:** Advanced PDUs provide overcurrent, short-circuit, and thermal overload protection, along with programmable startup sequencing and fault limits .
- **Modularity and Scalability:** DIN-rail mount or rack-mounted units allow flexible expansion, supporting 12V, 24V, 48V, or -48V DC systems, suitable for telecom, industrial, and oilfield applications .
