

How long does it take for a broadband fiber distribution box to be installed

Overview

Typically 1-3 hours from technician arrival to working internet. More complex installs (multi-story, condos with restricted access) can take 3-4 hours. Outside plant work (running fiber to your street) is separate and may take weeks if the neighborhood isn't yet served. Your new connection should begin on the same day your old. Installation timelines swing from next-day self-installs to multi-week civil digs. First-time FTTP properties needing a blow or blast of fibre through microducts. Installation times for Fibre to the Premises (FTTP) can vary, depending on how close the fibre cable is, and whether you already have an Optical Network Termination unit (ONT). We'll let you know how quickly you could be up and running when you order fibre broadband. The engineer installs an ONT (Optical Network Terminal) on an outside wall and runs a fibre cable to your router. This is because the fibre cable needs to be laid over a longer distance, which can be. Most installations take between two and four hours, but this depends on the property type and how the fibre is routed.
