

How long is an aluminum alloy cable tray

Overview

The standard NEMA lengths for cable tray are 12, 20, 24 and 30-feet, although some manufacturers like Eaton offer cable tray in lengths up to 40 feet. Our Aluminum Alloy Cable Tray is developed in-house with reference to the NEMA VE1-1979 Cable Tray Systems standard. Designed with simplicity and durability in mind, it offers outstanding corrosion resistance, long service life, and easy installation with virtually no maintenance required. Because of their lighter weight aluminum cable trays are easier to install than steel cable tray. For cable tray applications lacking sufficient space for the number of supports required for standard-length sections, choose T&B Cable Tray long-span AH1-8 series aluminum cable tray in 40-foot (12. Components are easy to attach with our quick connection system.
