

How much does a fiber optic cable pre-installation rack cost

Article Overview

Pre-terminated fiber optic cable assemblies typically cost \$1 to \$6 per foot, with total rack installation ranging from \$15,000 to \$30,000 for medium-scale commercial setups.

Cost Overview

Material Costs: Pre-terminated fiber optic cables are factory-made with connectors installed, offering a plug-and-play solution. Prices vary by fiber type, strand count, and length. For example, single-mode or multimode cables with 12 to 288 strands can range from \$1 to \$6 per linear foot at retail, with bulk wholesale prices as low as \$0.09 to \$1.52 per foot. Pre-terminated assemblies generally cost more than standard bulk cable due to factory termination and testing.

Installation Costs: Installing a pre-terminated fiber rack involves labor for mounting racks, routing cables, and connecting patch panels. Typical commercial building installations with 100-200 network drops can range from \$15,000 to \$30,000, depending on complexity, building layout, and whether the installation is indoor, outdoor, or underground. Labor rates for routing and termination can add \$1 to \$12 per foot, depending on obstacles, conduit use, and access.

Additional Factors Affecting Price:

- Fiber Type: OM3/OM4 multimode or single-mode fiber affects cost per foot.
- Strand Count: Higher strand counts increase material costs.
- Connector Type: MPO, LC, or hybrid connectors influence pricing.
