

How much does a junction box cost in Chile

Article Overview

Junction boxes in Chile typically range from around CLP 12,000 for standard residential units to significantly higher prices for industrial or specialized models.

Typical Prices

- Standard residential or small project junction boxes: Prices start at approximately CLP 12,378 for a basic plastic enclosure measuring 120 x 131 x 27 mm, suitable for general wiring projects (Mercado Libre) .
- Industrial or specialized junction boxes: Units designed for harsh environments, such as explosion-proof, stainless steel, or corrosion-resistant boxes used in mining, energy, or large-scale construction projects, can cost several times more, depending on specifications, certifications, and material quality (IndexBox) .

Factors Affecting Price

- Material: Plastic enclosures are cheaper, while metal (steel, aluminum, stainless steel) or corrosion-resistant materials increase costs.
- Certification and Safety Standards: Explosion-proof or ISO-certified boxes carry a premium due to testing and compliance requirements.
- Size and Complexity: Larger boxes or those with multiple compartments for complex wiring are more expensive.
- Import and Exchange Rates: Many junction boxes or raw materials are imported, so fluctuations in the Chilean Peso versus the US Dollar can affect local prices.
