

How much does a meter of steel structure cable tray cost

Article Overview

Steel cable trays typically cost between \$10 and \$30 per meter, depending on material, type, and coating.

Price Range and Material Factors

The cost of steel cable trays varies based on the type of steel and surface finish. Pre-galvanized steel is the most affordable, suitable for dry indoor environments, while hot-dip galvanized (HDG) steel offers better corrosion resistance for outdoor or industrial settings and costs more. Stainless steel trays are the most expensive, ideal for highly corrosive or hygienic environments, with prices often ranging from \$20 to \$100 per meter. Ladder trays generally cost more than perforated or wire mesh trays due to their higher load capacity and structural strength .

Additional Cost Considerations

The total cost per meter also includes supports, brackets, bends, and tees, which can add 20-30% to the overall budget. Covers for outdoor trays further increase costs, sometimes nearly doubling the price of the tray itself. Labor, shipping, and installation complexity also influence the final cost .

Cost-Saving Tips

- Bulk purchasing can significantly reduce per-meter costs.
- Choosing perforated trays instead of ladder trays can save 15% or more if heavy load capacity is not required.
