

How much does an 8-core fiber optic cable for smart buildings cost

Article Overview

An 8-core fiber optic cable for smart buildings typically costs between \$0.50 and \$2.00 per foot, depending on fiber type, jacket, and installation requirements.

Material Costs

The price of fiber optic cable depends primarily on fiber type and core count. For an 8-core cable:

- Single-mode (OS2): Approximately \$0.50 to \$1.50 per foot for indoor-rated cables, with higher-end options for plenum or armored versions .
- Multimode (OM3/OM4): Typically \$0.75 to \$2.00 per foot, as multimode fibers are slightly more expensive due to manufacturing complexity and higher data throughput .
- Armored or specialized jackets: Adding steel tape or LSZH (Low Smoke Zero Halogen) jackets can increase costs by 20-50% per foot . For bulk purchases, wholesale pricing may reduce the per-foot cost to \$0.25-\$0.60, while retail or pre-terminated assemblies can be higher due to factory termination and connectorization .

Installation Considerations

Installation costs vary based on environment and complexity:

- Indoor runs: Typically \$1.00-\$3.00 per foot including labor, conduit, and terminations .
