

How much does an electricity meter and distribution box cost

Article Overview

Replacing a distribution box typically costs \$1,200–\$6,000, while an electricity meter replacement ranges from \$500–\$5,000, depending on amperage, installation complexity, and location.

Distribution Box Costs

The cost of a distribution box (electrical panel) depends on amperage, location, and whether a full upgrade is needed. For a standard 100–125A indoor panel, replacement including labor and materials usually runs \$1,200–\$2,500. A 200A outdoor upgrade with a new meter socket can cost \$3,000–\$6,000. High-end projects, such as smart meters, main-tie panels, or complex wiring, may increase costs further. Labor typically ranges from 6–18 hours at \$75–\$120 per hour, with additional charges for permits, structural work, or conduit rerouting, and regional variations can affect the total price.

Electricity Meter Costs

Replacing an electricity meter box (meter socket) generally costs \$500–\$2,100 for standard residential systems. Larger or high-capacity systems, such as 200A or 400A, or full service upgrades, can reach \$4,000–\$5,000. The meter box itself usually costs \$50–\$500, with extra fittings adding up to \$100. Labor rates for electricians range from \$50–\$130 per hour, plus service call fees of \$100–\$200. Permit fees typically add \$150–\$300 to the total. Adding a second meter for rental units or high-load appliances can cost \$1,400–\$4,700+ depending on complexity.
