

How much does copper-clad aluminum mesh optical cable cost

Article Overview

Copper-clad aluminum (CCA) mesh optical cables currently range from approximately USD 5,150 to USD 7,005 per metric ton, depending on region, copper content, and product form.

Current Price Ranges by Region

- North America: CCA wire prices average around USD 5,150–5,549/MT, influenced by higher energy, logistics costs, and limited import volumes from Europe .
- China: Prices reached USD 6,601/MT in March 2026, driven by strong demand from power, telecom, and electronics sectors, as well as higher copper input costs .
- Europe (Germany): Prices were approximately USD 6,661/MT, with selective purchasing and cautious restocking moderating demand .
- Argentina: Prices averaged USD 7,005/MT, reflecting local procurement adjustments and currency-related cost pressures .
- Japan: Prices were around USD 5,183/MT, rising due to selective restocking after prior destocking cycles .
- South Korea: Prices increased by 4.89% quarter-over-quarter, averaging USD 5,290–5,549/MT, supported by export-driven demand and limited spot availability .

Factors Affecting Pricing

- Copper Layer Thickness: CCA products with 10% or 15% copper content command higher prices due to increased conductivity .
