

How much does it cost per meter to lay outdoor fiber optic cables in ducts

Article Overview

Installing outdoor fiber optic cable in a duct typically costs between \$4 and \$14 per foot, depending on cable type, distance, and installation complexity.

Material Costs

The fiber optic cable itself ranges from \$0.25 to \$1.50 per foot for standard outdoor-rated singlemode or multimode cables, with armored or high-strand-count cables costing more . Bulk purchases can reduce per-foot costs, for example, a 10,000 ft reel of singlemode cable may cost around \$0.62 per foot . Cable type, strand count, and protective jackets (armored or direct-burial rated) significantly influence the material cost .

Installation Costs

Installing fiber in a duct adds labor, trenching, conduit, splicing, and termination costs. Typical labor rates range from \$60 to \$180 per hour, depending on technician skill and regional labor markets . Trenching or directional boring can cost \$8-\$40 per foot, while conduit installation adds \$0.50-\$1.50 per foot . Fusion splicing and testing add additional labor and material costs.
