

How much does underground fiber optic cable cost in the Maldives

Article Overview

Underground fiber optic cable installation typically costs between \$60,000 and \$80,000 per mile, with material costs ranging from \$6 to \$14 per linear foot for direct-burial cables.

Material Costs

Underground fiber optic cables designed for direct burial, such as armored or gel-filled cables with water-blocking protection, generally cost \$6–\$14 per linear foot. Additional conduit systems, like HDPE or PVC, add \$2–\$4 per foot, while handholes or access vaults range from \$200–\$800 each depending on size and specifications. Pre-terminated assemblies and patch cables may increase costs further due to factory termination and connector type considerations .

Installation Costs

The installation of underground fiber involves trenching, directional boring, excavation labor, and safety measures. Trenching equipment rental can cost \$200–\$500 per day, while directional boring rigs may run \$800–\$1,500 daily. Labor for excavation typically ranges from \$7–\$50 per linear foot, with rocky terrain or high water tables potentially doubling costs. Urban areas may require additional traffic control and certified flaggers, adding \$1–\$10 per foot . Overall, total underground fiber installation averages \$60,000–\$80,000 per mile, or roughly \$1,000–\$1,250 per residential household passed, depending on population density, terrain, and route complexity .
