

How to delete a VLAN that was mistakenly added to an H3C core switch port

Article Overview

To delete a VLAN from an H3C switch port, first remove it from all interfaces, then delete any VLAN interfaces, and finally remove the VLAN itself.

Step-by-Step Procedure

- Access the Switch
- Connect to the H3C switch via console, Telnet, or SSH.
- Enter user view mode:
- Enter system view:

sys

- Remove VLAN from Interfaces
- Identify all interfaces where the VLAN is configured.
- Enter each interface and remove the VLAN assignment. For example, to remove VLAN 20 from GigabitEthernet1/0/5:

```
interface GigabitEthernet1/0/5[H3C-GigabitEthernet1/0/5] undo port access vlan 20
```

- Repeat this step for all interfaces that have the VLAN configured .
- Delete VLAN Interfaces
- If a VLAN interface exists for the VLAN, delete it;
