

How to install a double-door iron electrical distribution box

Article Overview

Install a double-door iron distribution box by selecting a safe, accessible location, securely mounting the enclosure, connecting wires correctly, and labeling circuits for maintenance.

Step 1: Choose the Installation Location

Select a dry, accessible area away from water, flammable, or corrosive substances. Ensure the box is near the main power supply for easy connection and maintenance. For residential setups, a height of around 1.5 meters is recommended, while industrial installations may vary depending on surrounding equipment. Leave sufficient space around the box for ventilation and future maintenance .

Step 2: Prepare the Tools and Materials

You will need:

- Expansion bolts or screws for mounting
- Wire strippers and screwdrivers
- Circuit breakers and terminals
- Cable ties for wire management
- Insulation resistance tester for final checks
- Personal protective equipment (PPE) such as gloves and safety glasses
