

How to install a track light junction box

Overview

Sketch ceiling joists, junction box, and any corners. For T-bar. This flexible system requires a secure electrical connection to the main home wiring, which is accomplished through the track lighting junction box (J-box). The end can only be installed on one end. This is important to achieve good electrical contact. Track lighting is a system with an electrified power channel (the track) plus removable luminaires (track heads) that you can reposition as displays or layouts change. You just need to figure out the length of track you need, where you want it, how to fasten it to the ceiling. This step-by-step guide shows how to safely install track lighting, connect wiring, and position fixtures for the best results.
