

How to install fiber optic cable for home routers

Article Overview

Installing fiber optic cable for a home router involves connecting the fiber line to an Optical Network Terminal (ONT), linking it to your router via Ethernet, and configuring your network for optimal performance.

Required Equipment

- Optical Network Terminal (ONT): Converts fiber light signals into electrical signals for your router. Usually provided by your ISP .
- Fiber optic cable: Typically a thin, yellow cable with SC/APC or SC/UPC connectors .
- Fiber-ready router: Ensure it supports gigabit speeds or has a WAN/SFP port compatible with fiber .
- Ethernet cable: Connects the ONT to your router .

Step-by-Step Installation

- Locate the fiber wall outlet: This is where the ISP's fiber line enters your home .
- Connect the fiber optic cable: Plug one end into the wall outlet and the other into the ONT's designated port .
- Power on the ONT: Use the provided adapter and wait 2-5 minutes for the status lights to stabilize .
- Link ONT to router: Use an Ethernet cable to connect the ONT's LAN/Ethernet port to your router's WAN port .
