

How to peel open a fiber optic cable

Overview

Peel Open the Cable: After the rip cords have created the initial opening, peel back the remaining jacket to fully expose the inner fiber optic strands. Rip cords are vital to splitting the outer jacket. Remove. < Level Up Your Fiber Skills – Join the One Up Techs Skool ☐☐ <https://www.com/oneuptechs> Please like, Subscribe, and comment any questions you may have. "Peel" is a noun or a verb referring to the outer covering of something, like a fruit or vegetable, or the act of removing such a layer. This document describes handling practices for the sheath removal of 288 and 432 fiber RocketRibbon Cable -250 All-Dielectric gel-free ribbon cable. Cable-end and mid-span access procedures are outlined in this document. Also known as optical fiber cable strippers, they hold cable within a slot, squeeze their jaws to press through the coating, and slide the coating off the end of the cable.
