

How to set up a PPPoE fiber optic router

Article Overview

To set up a PPPoE fiber optic router, connect it to your ONT, access the router's admin panel, select PPPoE as the internet type, and enter your ISP-provided username and password.

Step 1: Connect Your Hardware

- Plug in the router's power adapter and ensure it is powered on.
- Make sure your Optical Network Terminal (ONT) is powered and the LED indicators are active.
- Connect an Ethernet cable from the ONT's LAN port to the WAN port on your router.
- Connect your computer to the router via Ethernet or Wi-Fi using the default network credentials printed on the router label .

Step 2: Access the Router Admin Panel

- Open a web browser and enter the router's IP address (commonly 192.168.0.1 or 192.168.1.1) in the address bar .
- Create a strong admin password with uppercase, lowercase, numbers, and special characters, then log in .

Step 3: Configure PPPoE Settings

- Navigate to the WAN or Internet Settings section.
- Select PPPoE as the connection type .
