

Huawei Energy Storage Distribution Box

Overview

The Huawei DCBOX-9/5-H0 electric panel is an essential low-voltage solution in energy storage systems, facilitating efficient energy management between the grid and batteries. It supports connections of up to nine Smart Rack controllers to five Smart PCS units, managing up to 1 MW. Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series. Huawei's Smart String Grid-Forming ESS ensures robust protection through five layers of integrated safety design, from individual cells, battery packs, racks, systems, and the grid. Built for reliability, this approach promises end-to-end safety throughout its lifecycle, covering manufacturing. There is a dedicated pack monitor inside the box that measures all voltages and currents and passes the information to the MCU using simple twisted-pair communication.
