

Huawei GPONC optical module price

Article Overview

Huawei GPON optical modules typically range from \$80 to \$250 per module, depending on model, optical class, and vendor.

Huawei offers a variety of GPON optical modules designed for OLT platforms, including GPON, XG-PON, XGS-PON, and 50G-PON technologies, with options such as Class B+, Class C+, Class C+ Pro, and Class D optics . Modules like the OM5270S-D2SW support both GPON and XGSPON, operate over single-mode fiber, and provide optical budgets sufficient for distances up to 20 km or more . These modules are carrier-grade, CE/RoHS certified, and compatible with most Huawei OLT systems .

Pricing Overview

- Standard GPON SFP modules: Approximately \$80–\$120 per unit, suitable for typical FTTH deployments .
- XG-PON/XGS-PON modules: Around \$150–\$250, offering higher bandwidth and longer optical reach .
- Combo modules supporting multiple PON standards (GPON + XG-PON/XGS-PON): Prices vary depending on optical class and vendor, generally in the \$200–\$250 range . Prices can fluctuate based on region, vendor, and bulk purchase agreements. Some suppliers also offer modules with custom-encoded firmware for broader compatibility, which may affect cost .

Key Features Affecting Price

- Optical class: Higher optical budgets (Class C+ or D) support longer distances and larger splitter ratios, increasing price .
