

Huawei builds fiber optic cable in Germany

Overview

Huawei will soon be selling its "FTTR" system for do-it-yourself fiber optic home cabling in Germany. The Chinese company Huawei has developed a fiber optic installation system for private households: Fiber-to-the-Room (FTTR). A special glue. Huawei says it has won a contract from German city network operator M-net to assume sole responsibility for the second phase of a gigabit broadband network deployment. The roll out will include the use of G. fast as an in-building approach to serve residents of multiple dwelling units (MDUs) as part. In mid-2024, only 23 percent of households were connected to the fibre network (homes connected), and only 11 percent had booked a fibre connection. Why is the expansion going so slowly?

What challenges need to be overcome?

And above all, what solutions can be used to accelerate the process?

To. Photo: Henning Gajek / teltarif The idea then was to wire the fiber optic cables up to the individual rooms, that is, to "wire" the whole house or the whole house with fiber optic. 8% of homes passed as of mid-2024, it has a wide gap to close. Operators are working at full. Full-fibre access as strategic infrastructure: strengthening public policy for Europe Fixed broadband (FBB) is the workhorse of the internet, carrying about 90% of all traffic in Europe.
