

Huijue ONU equipment model GPON

Overview

HG8145V5 is a GPON Optical Network Terminal designed for FTTH scenario. It provides high-performance forwarding capabilities to ensure excellent experience with Internet and HD video services. It has a small, smart appearance and green, energy-saving advantage. A panel-type Optical Network Unit (ONU) that can be easily installed in 86-type electrical boxes on enterprise campuses, Huawei OptiXstar P871E is equipped with one Gigabit Passive Optical Network (GPON) or 10-Gigabit-Capable Symmetric Passive Optical Network (XGS-PON) port in the. A panel-type. er than 2db of theoretical, basic fault can be judged as optica eyes. so do not look to the PON port directly,cover the cap when it is not us tains electrostatic sensitive components,so do not open it without P us be payed for maintenance, and acVSOL offers a wide range of XPON/GPON/EPON ONU/ONT, integrating Wi-Fi, CATV, and VoIP for high-speed, simplified network deployment. 3 protocol,It is based on mature and stable, and high cost-effective Gigabit GPON technology which adopts high-performance xPON ZTE. GPON ONT HG8546M optical network terminal (ONT) is a indoor optical network terminal in FTTx solution. The HG8546M provides three FE Ethernet ports, one GE Ethernet port, one POTS port and one USB. With a single Gigabit Ethernet port and broad compatibility across XPON, EPON, and GPON networks, it is the ideal choice for ISPs, telecom operators, and enterprise FTTH.
