

Huijue Original Optical Modules

Article Overview

Huijue offers a range of optical modules including SFP, SFP+, SFP28, XFP, QSFP+, CFP, and innovative optical fiber energy storage modules.

Standard Optical Modules

Huijue provides optical modules compatible with various transmission rates and network requirements. These include:

- SFP (Small Form-Factor Pluggable): Supports LC fiber connectors and standard data rates for general networking applications.
- eSFP (Enhanced SFP): Monitors voltage, temperature, bias current, and optical power, providing enhanced performance monitoring.
- SFP+: An upgraded SFP module supporting higher data rates, typically 10 Gbit/s.
- SFP28: Same interface size as SFP+, designed for 25GE transmission.
- XFP (10 Gigabit Small Form-Factor Pluggable): Supports 10 Gbit/s transmission with LC fiber connectors, larger than SFP+.
- QSFP+ (Quad SFP+): Supports MPO fiber connectors and higher-density applications.
- CFP (Centum Form-Factor Pluggable): Larger module supporting high-speed data transmission, often used in 100GE networks. All these modules are hot-swappable, allowing easy installation and replacement without powering down the system.
