

Huijue single-mode optical module RX is NA

Overview

Run the display transceiver slot slot-id verbose command in the system view to check whether the receive power Rx Power of the local interface is within the acceptable range. If so, collect alarms, logs, and configurations, and contact technical support personnel. If not, go to. If an optical module has been certified by Huawei, its label contains "HUAWEI", as shown in Figure 1-1. The distinction is important as it affects network performance, distance, and overall cost.
