

Indoor fiber optic ODF rack inlet line

Overview

This ODF is capable to access up to 12 pcs optical cable and 960 pcs of fiber patch cords, the internal structure is equipped splice tray to operate optical splice for optical fiber and PLC splitter installation, individual space for inlet and outlet fiber . This ODF is capable to access up to 12 pcs optical cable and 960 pcs of fiber patch cords, the internal structure is equipped splice tray to operate optical splice for optical fiber and PLC splitter installation, individual space for inlet and outlet fiber . Premium-Line rack mounted Optic Distribution Frame – ODF suits for standard 19” server cabinet installation. This ODF is available for maximum 96 cores terminated inside with SC or FC connectors & adapters, or 192 cores for LC duplex adapters. Two simplex adapters stack design make it in easy way. The ODF is designed to be used to patch, splice optical fibers and accommodate optical splitters in a Central Office and SDF room in Multi-Dwelling Unit customer premises. At CO, the purpose is to provide interconnection between outside cables to Optical Equipment by using fibre patch cord. Integrated splice and distribution. This complete guide explores everything you need to know about ODFs — from their structure, types, and key components, to installation best practices and modern design trends. Designed for reliability and ease of use, our rack-mount and wall-mount solutions provide the perfect environment for splicing, terminating, and managing your critical fiber optic connections.
