

Indoor leakage protection distribution box

Overview

The low-voltage distribution box supports surface-mounted/flush-mounted installation, offering high safety performance. It integrates functions such as overload protection, short-circuit protection, leakage protection, metering, and intelligent control. Design & weatherproof designed, effectively block splashing water, rain, dust, snow, oil, UV, etc. Generally, it should be installed behind the door or in the place where the upper part. For decades, the only explosion protection technology available in North America was the cast metal enclosure systems designed for Class I, Division 1 environments, also known as NEMA 7 explosionproof enclosures. Today, more than 3/4 of hazardous location installations are done in Class I, Division. Power distribution boxes are used as distributors in vehicles, on machines and indoors if several consumers are to be used simultaneously in conjunction with an inverter with galvanic isolation. Choose VIOX. The box is made of polystyrene, a self-extinguishing plastic which provides corrosion free, highly impact resistance, stable and maintenance free use. Widely applied in buildings, industrial.
