

Integrated Power System DC Comprehensive Tester

Overview

Product description: AS-DC-20V50C1000D battery integrated test system, 20kW high-power charging and discharging, $\pm 0.05\%$ voltage accuracy, four-wire AC/DC internal resistance detection, real-time uploading of MES data, support for code-sweeping startup and overcurrent protection. The Procyon PTS 2100-10 is a configurable turnkey Power Test System, delivering automated test equipment (ATE) to some of the world's largest-volume manufacturers as well as the affordability needed by niche market producers Aerospace, defense, and avionics power supply ATE test systems. REGATRON has successfully delivered a comprehensive and fully regenerative power testing solution to IEP, Instituto Electrotécnico Português, one of Portugal's leading certification and research laboratories in the field of electrical and electronic testing. The installation includes three. The LD-ZZ DC power supply comprehensive characteristic tester is a mobile, high-performance DC power supply testing equipment designed for power system substations (stations). ZX-CFD DC System Integrated Testing Instrument was.
