

Integrated power cabinet with high-precision RoHS compliance

Overview

ROHS compliant Smart Power Distribution Cabinet featuring maximum 48-bit output and real-time power monitoring for efficient power management. Widely used in large/medium/small data center, office, dispatch center, control center and other scenarios. The product is designed according to IEC standards and supports. Expert integration, ensuring your test setup is safe, compliant, and reliable. The newest addition to the family of Integrated Equipment products, the Integrated Power Center 2 (IPC2™) provides maximum flexibility to meet customers' specifications. With 17 years of manufacturing expertise and comprehensive ISO certifications, we provide customized solutions for power distribution, control systems, and. All PULS standard devices published on our website comply with the requirements of Directive 2011/65/EU ("Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment" - RoHS II) of the European Parliament and Council dated 8 June 2011, as well as Delegated.
