

Integrated power distribution automation cabinet IP54

Overview

Our robust electrical distribution box ensures reliable performance in industrial switchgear applications. The cabinet shown in the reference images is a large indoor multifunctional power distribution cabinet, designed to provide centralized power distribution and control in indoor environments — including factories, equipment rooms, industrial automation lines, commercial buildings, edge data rooms. The RCAB-OD-4535 is an outdoor cabinet system for active and passive equipment that provides maximum protection of customer's equipment against vandalism and extreme weather conditions. This cabinet is the ideal solution. Universal industrial cabinets designed for both outdoor and indoor. A2: With 20 years of experience in the electrical automation industry, we provide integrated power distribution and automation solutions, including design, assembly and programming of VFD cabinets, PLC control panels and turnkey systems—from individual units to plant-wide PLC-controlled. These industrial power distribution cabinets are engineered for demanding applications, offering high durability, flexible customization, and reliable performance.
