

Intelligent Central Signaling Device for Distribution Cabinets

Overview

Abstract: The intelligent control device can be used for 3~35kV indoor high-voltage switch cabinets, suitable for various switch cabinets such as central cabinets, handcart cabinets, fixed cabinets, ring network cabinets, etc., with a primary circuit simulation. Application of Intelligent Control Device in High Voltage Switchgear Ankerui Electric Co. REC615 and RER615 can be. WERMA offers numerous solutions for visual and audible signaling devices for installation in control and signaling devices or for device and apparatus construction. A wide range of LED lights, warning lights, buzzers and sirens are available, as well as compact signal towers in the appropriate. Choose the most suitable pre-designed switchgear solution to save time and maximize reliability Electrical distribution digitalization is aimed to answer rising demand for energy efficiency and continuity of service for electrical installation.
