

Intelligent Cold Aisle Upgrade Solution

Overview

The SmartAisle offering optimizes infrastructure deployment and management with an intelligent row-based system that integrates data center racks, power, row cooling, aisle containment, monitoring and control technologies for spaces with up to 40 racks. Vertiv™'s Data Center Users' Group survey respondents ranked energy efficiency their second highest concern in spring 2009. In fall 2005, it was not even among the top five. Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing. Aisle containment solution is designed to separate hot and cold air in mission critical data centers to reclaim underutilized cooling capacity.
