

Iron distribution box with circuit breaker

Overview

An iron breaker box, also known as a circuit breaker panel or electrical distribution board, is a crucial component in modern electrical systems. Today, electrical systems are essential for homes and industries. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. Our company has convenience transportation, It is just 5 minutes from the leliu station and 20 minutes from the nearest. MDB series metal distribution boxes are designed for safe, reliable distribution and control of electrical power as service entrance equipment in residential, commercial and light industrial premises. Features ○Made out of high quality.
