

Ivorian Tubular Busbar Manufacturer

Article Overview

Currently, there are no publicly listed tubular busbar manufacturers based in Ivory Coast; most suppliers are located in Europe, the UK, and other regions.

Overview of Busbar Manufacturing

Busbars are conductive bars used for power distribution in control panels, switchgear, and high-current equipment. They are typically made from copper, aluminum, or Cuponal, and can be tubular, laminated, or solid depending on the application. Tubular busbars are valued for their high current-carrying capacity, mechanical strength, and ease of branching connections. Global manufacturers include:

- Promet AG (Europe): Specializes in copper, aluminum, and Cuponal busbars with precision cutting, milling, welding, and finishing.
- Sykatec GmbH (Germany/Romania): Produces custom copper and aluminum busbars, including complex shapes and DC link rails, with digitalized manufacturing for efficiency.
- Mersen (Global): Offers laminated busbars with advanced insulation and plating options, suitable for harsh environments.
- Electropak Ltd (UK): AS9100-certified manufacturer supplying aerospace, rail, automotive, and electrical sectors, including Africa, with custom copper and Cuponal busbars.
