

# Jamaica SFF optical module

## Overview

This SFF module provides 2km transmission distance over multi-mode fiber at a nominal wavelength of 1310nm. The transmitter section uses a 1310nm FP laser that is a class 1 laser compliant according to International Safety Standard IEC 60825. AITAF provides end-to-end optical communication solutions, structured cabling, ODN, optical modules, fiber testing instruments, data center networks, base station energy, smart city communications. This fixed-design approach makes them the invisible engine powering a massive range of network equipment you use every day. It's the most common point of confusion. While both share the. SFF (Small Form Factor) is a small-package optical transceiver, usually with a 2×5 or 2×10 pinout, typically operating at speeds under 1250 Mbps and using an LC interface. Unlike their pluggable cousins, these soldered optical modules form the stable backbone of industrial equipment, routers, optical. ABSTRACT: This specification provides codes for module identifiers, encoding values, connector types, extended compliance codes, host electrical and module media interfaces, transceiver subtypes, fiber face and heatsink types.
