

Japan buys fiber optic cables

Overview

Fujikura will triple its optical fiber and cable production capacity, driven by escalating demand from AI data centres, particularly in the United States. The expansion involves a phased investment of up to 300 billion yen (approx. A lot of this demand is coming from the US, noted the company, which said it will look to increase. Far from being trapped in a traditional industry, Japan's three largest cable makers are reinventing themselves through distinct specialisations — data centres, automotive solutions and laser technology — leading to record profits and soaring valuations as they capture emerging opportunities in AI. Japanese manufacturer Fujikura Ltd. This expansion, approved by its board, aligns with U. -Japan cooperation on. The Tokyo-based company specializes in manufacturing electrical equipment, including power and telecommunication systems, optical fiber devices, and more. The MSCI Global Indexes, used by investors to benchmark and allocate trillions in global assets, spotlight companies like Fujikura as key players in emerging and developed markets, driving increased visibility and investment., a Japanese wire cabling firm, has skyrocketed as a top.
