

KVM fiber optic receiver price

Article Overview

Fiber optic KVM receivers typically range from \$500 to \$2,500 or more, depending on features, resolution, and transmission distance.

Price Overview

The cost of a KVM fiber optic receiver depends on several factors:

- **Resolution and Video Quality:** Receivers supporting 4K HDMI at 30Hz or higher, like the AV Access 4KIP500F-KVM, are generally more expensive than those supporting 1080p .
- **Transmission Distance:** Devices capable of long-range transmission (up to 10 km or 30 km with single-mode fiber) cost more due to advanced optical modules and SFP requirements .
- **USB and Peripheral Support:** Receivers that support USB 2.0 or 3.0 for remote keyboard, mouse, or camera control add to the price .
- **Brand and Warranty:** Premium brands like Black Box or AV Access often include technical support and compliance certifications, which can increase cost .

Typical Price Ranges

- Entry-level fiber KVM receivers (short-range, 1080p, basic USB support): \$500-\$800
- Mid-range receivers (4K support, 500-1,000 meters, USB 2.0): \$1,000-\$1,500
- High-end receivers (long-range, 4K, multi-mode or single-mode fiber, advanced USB and audio support): \$1,500-\$2,500+
