

KVM4 Switcher Installation Method

Article Overview

The DKVM-4U KVM switch can be installed by connecting your keyboard, mouse, monitor, and computers using the included KVM cables, with hot-swappable support and optional hotkey switching.

Step-by-Step Installation

1. Connect Console Peripherals

- Attach your USB keyboard to the DKVM-4U console USB keyboard port.
 - Attach your USB mouse to the console USB mouse port.
 - Connect your monitor to the DKVM-4U VGA console port .
- #### 2. Connect Computers to the KVM Switch

- Using the included KVM cables, connect the USB B-type connector to the DKVM-4U USB port and the VGA connector to the DKVM-4U VGA port.
 - Connect the other end of the KVM cable to each computer: the VGA connector to the computer's VGA port and the USB A-type connector to an available USB port on the computer .
 - Repeat this process for all computers you want to control with the KVM switch.
- #### 3. Power and Hot-Swap Support

- The DKVM-4U is hot-swappable, so you do not need to turn off your computers before installation .
