

# LC optical module splitter

## Overview

Fiber optic module delivered complete with 1:32 splitter terminated in LC/PC connectors. The 3U panel may be populated with up to 12 modules, the 1U panel with up to 3 modules, and they may be placed in any order in the panel. Corning Optical Communications offers connectorized splitter minimodules, suitable inside all fiber optic hardware where highest density is required. Splitter minimodule 900 micron is based on the PLC (Planar Lightwave Circuit) technology, which has a compact size. Passive splitters for. Optical splitters and couplers split or combine light—distributing signals injected into a single fiber strand to multiple fibers, enabling point to multi-point communication in Fiber To The Home (FTTH) networks based on ITU. T PON standards such as GPON, XGS-PON and new 25 and 50G standards. The signal can be distributed evenly to the user.
