

Ladder-type cable trays are available in wholesale quantities

Article Overview

Ladder-type cable trays are widely available in wholesale quantities, offering durable, versatile, and cost-effective solutions for industrial, commercial, and infrastructure cable management.

Overview

Ladder-type cable trays are designed with a rung-and-side-rail structure, resembling a ladder, which provides strong support for heavy cables while allowing optimal ventilation to prevent overheating. Their open design facilitates easy installation, maintenance, and inspection, making them ideal for high-capacity electrical and data cabling systems.

Material Options

- **Steel:** Mild steel trays are strong, cost-effective, and suitable for heavy-duty industrial applications. Hot-dipped galvanized steel offers corrosion resistance for outdoor or moisture-prone environments.
- **Stainless Steel:** Provides rust-free, durable performance in chemical or wet environments, with high load-bearing capacity.
- **Aluminum:** Lightweight and portable, ideal for installations where ease of handling is important.
- **Fiberglass:** Non-conductive and corrosion-resistant, suitable for specialized industrial applications.
