

MAL What type of distribution box

Article Overview

A MAL distribution box is typically a Main Distribution Board (MDB) used for central power distribution in residential, commercial, or industrial settings.

Overview

A MAL distribution box generally refers to a Main Distribution Board (MDB), which serves as the central hub for distributing electrical power from the main supply to various downstream circuits. It is designed to handle high loads and provide protection through circuit breakers, fuses, and other safety devices. The MAL box ensures safe and organized power distribution, preventing overloads and short circuits.

Key Features

- **Components:** Includes bus bars, MCCBs (Molded Case Circuit Breakers), fuses, and support equipment for controlling and protecting circuits.
- **Mounting:** Can be surface-mounted for industrial or retrofit applications, or flush-mounted for residential and commercial aesthetics.
- **Phase Type:** Available in single-phase for small loads or three-phase for industrial and large commercial facilities.
- **Protection Devices:** Often equipped with earth leakage devices, timers, and contact breakers to enhance safety.
- **Applications:** Used in buildings, factories, or complexes to distribute power to sub-distribution boards, lighting circuits, and heavy machinery.

Comparison with Other Distribution Boxes
