

Mauritius Temperature Measuring Optical Cable Model List

Article Overview

Fiber optic temperature measurement systems in Mauritius include distributed and point-sensing models from COMEM, Luna, Sumitomo, and Neoptix, suitable for industrial, medical, and high-voltage applications.

Distributed Fiber Optic Temperature Systems

- COMEM TECCA DE Systems
 - Uses 200-micron optical fibers for distributed temperature sensing.
 - Calibrated per channel for accurate measurements from -40°C to 120°C.
 - Requires minimal maintenance and supports long-range monitoring .
- Luna High-Definition Distributed Temperature Sensing (ODISI)
 - Provides continuous temperature profiles with sub-millimeter spatial resolution.
 - Supports distributed sensing up to 100 m per channel.
- Ideal for embedded or hard-to-access locations, immune to electromagnetic interference .
- OptaSense QuantX DAS Interrogator
 - Long-range distributed sensing up to 200 km.
 - High-fidelity temperature and strain monitoring with gauge lengths from 2 m to 35 m.
 - Suitable for infrastructure monitoring and industrial applications .
