

Metal cable tray CT type

Overview

CT-E-type cable trays have integrated extension part and for jointing bolt sets RS 5 (bolt M6x12 and nut M6) or quick locks CT-QL (for trays H=60mm) can be used. Both create a sufficient electrical conductivity, which eliminates the need to install a separate grounding wire. EAE Cable Tray System product E-Line CT is being manufactured as a hot dipped product that is used in heavy or medium duty application with its perforated design. This zinc coating is easily deformed. A cathodic action occurs on cut surfaces (up to 1. First, the steel is. CTK covers should be used for H75, H100 CTHF-E cable trays. Standard length of tray is 3000mm. H75 tray module: 8 pcs of M6x12 bolt. EzyStrut perforated cable trays are the strongest in their class with 20 mm return sides on all straight lengths, providing optimum strength and performance. CT-E-type trays are typically used in office- and commercial buildings, schools, hospitals and shopping centres, but also in warehouses, parking halls and industrial buildings. CT Cable Trays are made from black steel sheet. The steel material undergoes a hot-dip galvanizing process during the production stage.
