

Metal frame of the distribution box

Overview

There are several types of distribution box metal frame available, each designed to fulfill specific functions within an electrical system. Common types include circuit breakers, switchgear, and distribution panels. Whether used in industrial settings, on construction sites, or at large outdoor events – these solutions ensure reliable and long-lasting power distribution wherever it's. Distribution box metal frame are essential components in modern electrical infrastructure, designed to manage and distribute electricity safely and efficiently within various settings. Capacity from 14 to 56 modules: Multiple sizes to fit any project. IP40 and IK07 protection: Resistant to impact, dust and moisture. Features ○Made out of high quality.
